

## PHASE 4: BRANDING & UX SYSTEM IMPLEMENTATION

Build **Phase 4: Branding & UX System Implementation** for Franchise OS / Xpansion Console using the uploaded Xpansion Code brand guide.

### PHASE 4 GOAL

Apply the full Xpansion Code visual identity, UI tokens, and brand tone across the app so it feels premium, consistent, and production-ready.

---

## 1) BRAND SYSTEM IMPLEMENTATION (GLOBAL)

### BRAND PHILOSOPHY

Implement a high-performance, modern interface built on clarity, precision, and bold execution. Visual tone: dark foundation + energetic red accents + strong contrast.

### CORE PALETTE (MUST BE USED)

- ? Primary Red: '#EA1C24'
- ? Secondary Red: '#C7372C'
- ? Deep Crimson: '#710D0B'
- ? Near Black: '#191211'
- ? Charcoal: '#4A4743'
- ? Neutral Gray: '#94938F'
- ? Light Neutral: '#D6D7D2'

### TARGET COLOR RATIO

- ? 60% dark foundation colors
- ? 20% light neutral surfaces
- ? 10% primary red highlights
- ? 10% supporting grays

### DESIGN TOKENS (REQUIRED)

Create/standardize tokens:

- ? 'color.primary = #EA1C24'
- ? 'color.primaryHover = #C7372C'
- ? 'color.accent = #710D0B'
- ? 'color.background = #191211'
- ? 'color.surface = #4A4743'
- ? 'color.textPrimary = #D6D7D2'
- ? 'color.textSecondary = #94938F'
- ? 'color.lightBackground = #D6D7D2'

Implement as global CSS variables + Tailwind theme extension.

---

## 2) LIGHT + DARK MODE SYSTEM

## LIGHT MODE MAPPING

- ? Primary Background: '#D6D7D2'
- ? Secondary Panels: '#FFFFFF'
- ? Primary Text: '#191211'
- ? Secondary Text: '#4A4743'
- ? Buttons: '#EA1C24'
- ? Button Hover: '#C7372C'
- ? Borders/Dividers: '#94938F'

## DARK MODE MAPPING

- ? Primary Background: '#191211'
- ? Secondary Surface: '#4A4743'
- ? Primary Text: '#D6D7D2'
- ? Secondary Text: '#94938F'
- ? Primary Button: '#EA1C24'
- ? Button Hover: '#C7372C'
- ? Accent: '#710D0B'

## REQUIREMENTS

- ? Theme toggle persists user preference.
- ? Ensure WCAG AA contrast for text/buttons/chips.
- ? Remove any off-brand default blues/purples/greens unless semantic status requires it.

---

## 3) UI COMPONENT RE-SKIN (DESIGN SYSTEM PASS)

Apply new brand tokens to all reusable components:

- ? Buttons (all variants, hover/focus/disabled)
- ? Inputs, selects, textareas
- ? Dialogs/modals/drawers
- ? Cards/panels
- ? Tables (headers, row hover, borders)
- ? Tabs, badges/chips, alerts
- ? Sidebar/nav/header
- ? Empty/loading/error states
- ? Charts (axes/grid/lines/tooltips/legend)

## CHART STYLING RULES

- ? Primary series uses '#EA1C24'
- ? Secondary/supporting series use neutral grays and crimson accents
- ? Gridlines subtle and low-contrast
- ? Tooltip surfaces follow theme surface tokens

---

## 4) PAGE-LEVEL BRANDING PASS (ALL ROUTES)

Apply consistent brand styling and hierarchy to:

- ? '/' Dashboard
- ? '/tenants'
- ? '/locations'
- ? '/metrics'
- ? '/scorecards'
- ? '/trends'
- ? '/admin/imports'
- ? '/admin/alerts'
- ? '/admin/reports'
- ? '/admin/audit'
- ? '/portfolio' (if present from Phase 3)

#### PAGE UX REQUIREMENTS

- ? Consistent spacing scale
- ? Clear visual hierarchy (H1/H2/body/meta)
- ? Uniform CTA styling
- ? Consistent empty states + helper text
- ? Cleaner table readability and action alignment

---

#### 5) BRAND VOICE + COPY POLISH

Update UI copy to match Xpansion tone:

- ? Direct
- ? Confident
- ? Practical
- ? High-performance (no fluff)

#### COPY TARGETS

- ? Navigation labels
- ? Page headers/subheaders
- ? Empty states
- ? Error/success toasts
- ? Form helper text
- ? Button labels (action-first verbs)

---

#### 6) APP SHELL + IDENTITY

##### ADD/UPDATE

- ? Product title: ?Xpansion Console? (or ?Franchise OS Command Center? where appropriate)
- ? Favicon and app icon treatment aligned to brand palette
- ? Login/landing hero styling aligned to brand system
- ? Sidebar/header identity lockup and spacing

##### METADATA

- ? Add proper '<title>' templates per route

- ? Add meta description
- ? Add Open Graph and Twitter tags for clean sharing previews

---

## 7) ACCESSIBILITY + QUALITY GUARDRAILS

- ? Maintain keyboard accessibility on all controls.
- ? Ensure focus rings are visible in both themes.
- ? Verify contrast ratios across all major components.
- ? No hardcoded random colors in components; all colors must come from tokens.
- ? No regressions in existing functionality.

---

## 8) ACCEPTANCE CRITERIA (MUST PASS)

- ? Global tokens implemented and used consistently
- ? Light/dark themes match brand guide mappings
- ? All primary components re-skinned to brand
- ? All major pages visually consistent and on-brand
- ? No default off-brand color leakage in UI
- ? Route titles/meta/OG tags implemented
- ? Accessibility checks pass (focus visibility + contrast)
- ? Existing Phase 1/2/3 behaviors remain functional

---

## 9) WHEN DONE, OUTPUT

1. List of files changed
2. Token/theme files updated
3. Component library files re-skinned
4. Routes/pages updated
5. Metadata/SEO files updated
6. Accessibility checks performed + results
7. Before/after screenshots summary (by page)
8. Known design gaps/TODOs (if any)
